**EPOS software designed
with the end user in mind**

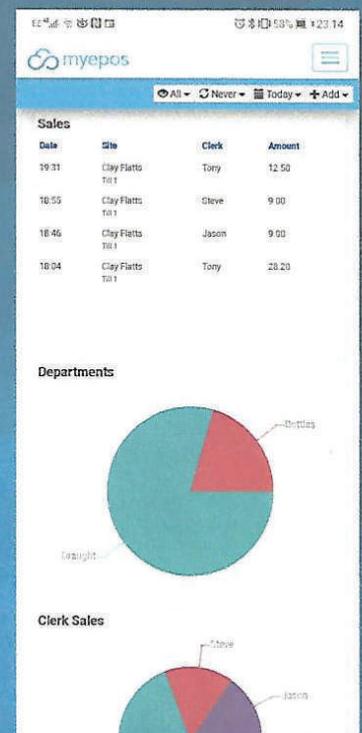

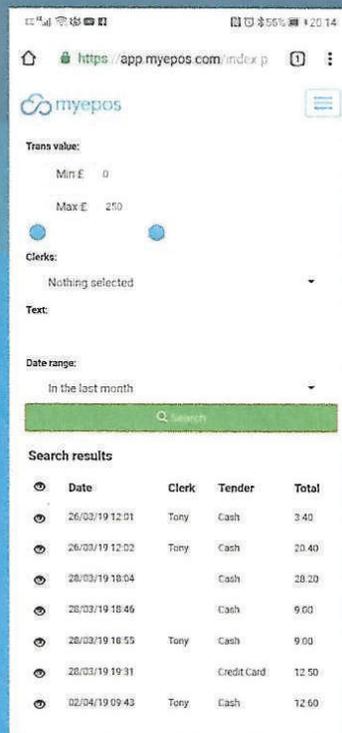

- Software Intuitive, flexible and easy to use
- Customisable interface and functionality
- Fast database management design
- Reliable market leading EPOS software

HANDHELD WAITER TABLET

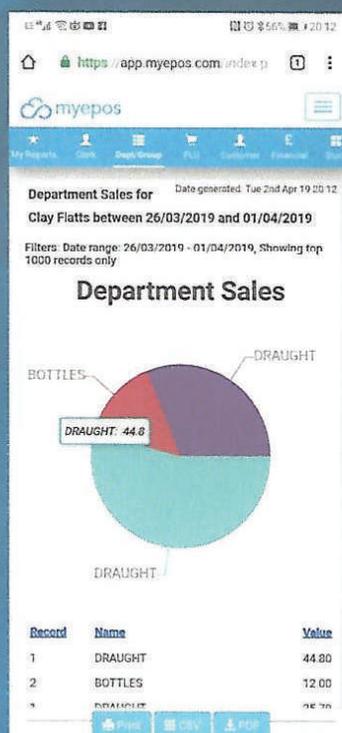

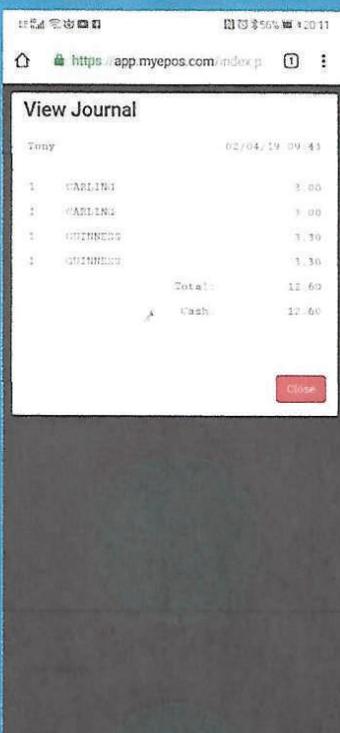

In a busy hospitality environment, efficiency of service can be vital to maintaining the high standard of your customer's experience. Our handheld waiter tablets allow your table staff to take customers orders directly into the myEPOS System and instantly issue order tickets to the bar or kitchen to begin preparation. No more running in and out of the kitchen, spend more time serving your customers.

MYEPOS ONLINE CLOUD BACK-OFFICE

With the optional Cloud Back-Office module all of your sales are uploaded in realtime to your own myEPOS Cloud account. You can monitor sales across multiple tills and even multiple sites all from the comfort of your own Laptop or Smartphone. Run reports and make program changes anywhere in the world

CUSTOMERS AND ACCOUNTS

myEPOS Touch boasts a comprehensive account tracking module. An excellent feature for trade counters or any business that offers invoicing facility to customers. From a single screen you can sell your products, produce delivery sheets, book in delivery times, and print (or even email) an A4 invoice to your customers. Statements can be run every month to keep your customers informed of their account status, and either printed or emailed directly.

CHIP & PIN CARD PAYMENTS

Every year shoppers move further and further towards more convenient methods of payment such as Chip & Pin, Contactless, and Smartphone based payment systems such as Apple Pay and Google Wallet. Make sure you're ready to accept all modern payment types with an EFT payment terminal along with your new myEPOS Touch system.

COMPREHENSIVE REPORTS

Statistics are everything to a modern successful business. The powerful reporting tools in myEPOS Touch give you all the tools you need to monitor your product sales data and customer spending habits. The live sales monitor allows you to watch your sales data in realtime from your Back Office PC. Reports can be printed, exported as Excel files, or sent via emailed directly into your inbox as a PDF file
