

QUORION

Data Systems GmbH

Quiet POS System with 15" Touch Screen for Large Restaurants & Retail Stores.

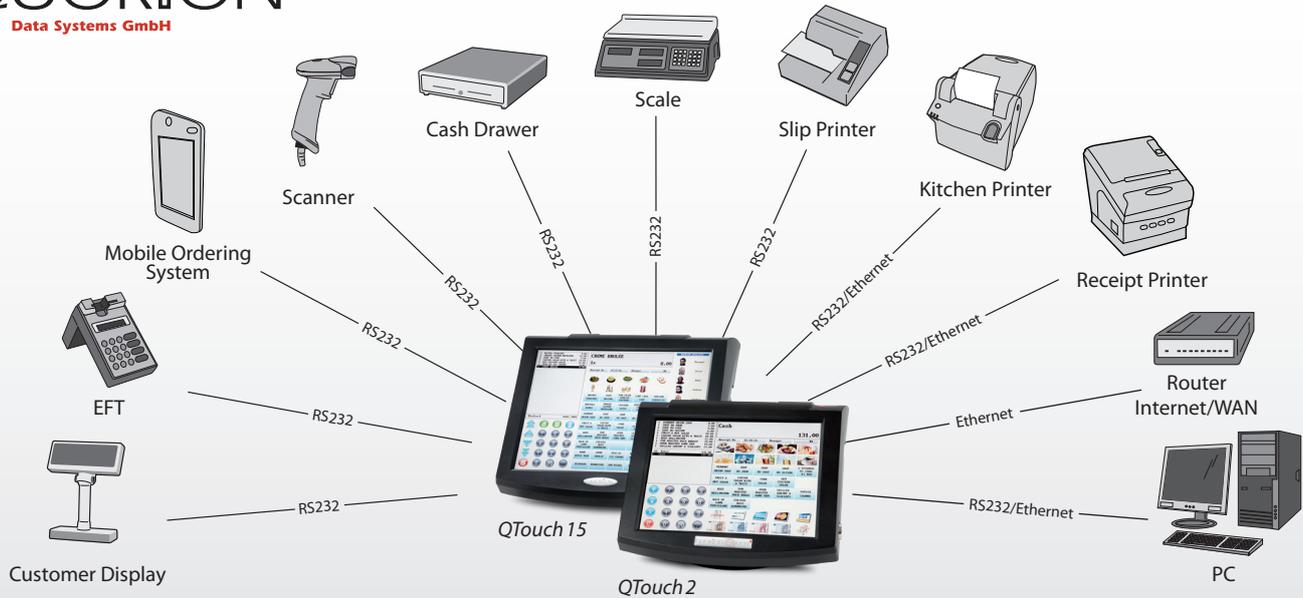

Today business owners face more pressure from tough competition, new business concepts, and eroding margins than ever before. How can you continuously deliver rapid, dependable service during peak hours, manage demands for greater product selections, and at the same time control escalating costs?

Enter the QTouch 15. The QUORION POS system presents the answers to face these and future challenges with confidence. The ergonomic design combined with powerful hard- and software features make the QTouch 15 the ideal solution for businesses, where appearance is as vital as performance.

The QUORION QTouch 15 is the larger brother of the successful QTouch 2. Boasting a 15" touch screen and integrated video card, clients can fully take advantage of extensive table and floor plans, because they are both managed visually on the large display. Operators will love the sleek design as opposed to the commonly found, bulky towers one sees in PC POS system designs. With a faster processor and larger touch screen sizeable businesses will favor the QTouch 15 over the smaller QTouch 2.

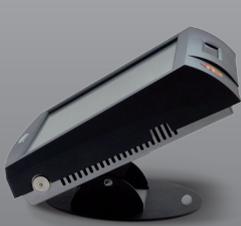

QTouch15
